

Timonty J. Evans, MD

Dr. Evans grew up in Naples, FL and graduated from St. John Neumann High School after which he attended the University of Central Florida where he obtained a Bachelor of Science degree in Biology. He then ventured up to our nation's capital where he obtained a Master of Science degree in Physiology from Georgetown University, graduating at the top of his class.

He went on to attend medical school at Creighton University in Omaha, NE. While at Creighton he participated in multiple extra-curricular activities including a medical mission to the Pine Ridge Indian Reservation, peer tutoring, and co-directing the Midwest Student Biomedical Research Forum. He also participated in research focused on complex knee reconstruction at Creighton as well as the summer research program at the famed American Sports Medicine Institute. He was elected into the Alpha Omega Alpha Medical Honor Society for his scholastic achievements throughout medical school. But his proudest accomplishment while in Omaha was meeting his wonderful wife, Diana, who was also attending medical school at Creighton.

He then completed his orthopedic surgery residency at Henry Ford Hospital in Detroit, MI. A busy, level 1 trauma hospital, he gained valuable experience in the techniques used for shoulder, hip and knee joint reconstruction, orthopaedic trauma and orthopaedic oncology. He developed an interest in orthopaedic oncology and presented award winning research at the regional and national level. He served as administrative chief resident during his final year in the program.

His interests in orthopaedic oncology, complex joint reconstruction and trauma led him to pursue further training in orthopaedic oncology at Moffitt Cancer Center in Tampa, FL. While at Moffitt, he trained with some of the nation's leaders in the field, especially with respect to computer navigation, complex hip and knee reconstruction and innovative ways of treating metastatic disease of the bones.

Dr. Evans and his wife have two wonderful children. They enjoy spending most of their free time outdoors - going for bike rides, adventuring in national and state parks, and enjoying the warm Florida sunshine. When they get the chance, they love traveling abroad and experiencing new cultures and cuisines.
